Accessori Accessories

La nostra gamma di prodotti standard

Accanto ai componenti realizzati su disegno del cliente, Effebiesse produce una propria gamma di leve, maniglie e accessori in zama. Ogni articolo nasce dal nostro ciclo produttivo interno: progettazione, costruzione dello stampo, pressofusione, finitura e trattamento galvanico.

Alongside components made to customer drawings, Effebiesse manufactures its own range of zamak levers, handles and accessories. Every item comes from our in-house production cycle: design, mould making, die casting, finishing and electroplating.
